

Reset Data Source Location for UACATG00

Certification Checklist 2005H

(For use with Checklist 2005C)

ODBC (RDO)

Connection Information
Provide necessary information to log on to the chosen data source

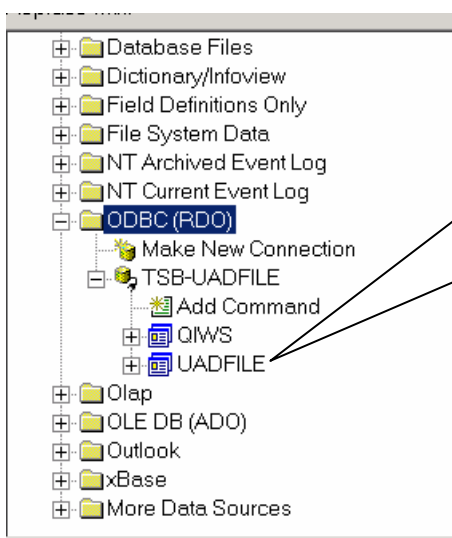

Server: TSB-UADFILE

User ID: router

Password: *

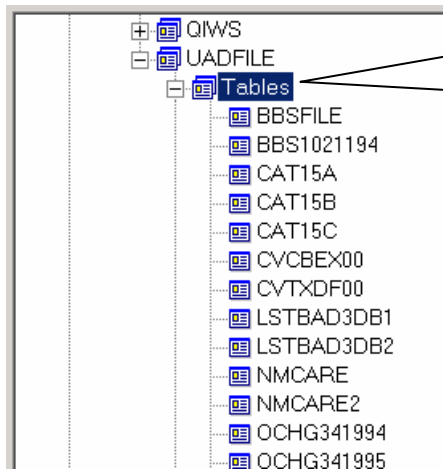

If you get this screen, key in router,router.

< Back Next > Finish Cancel Help

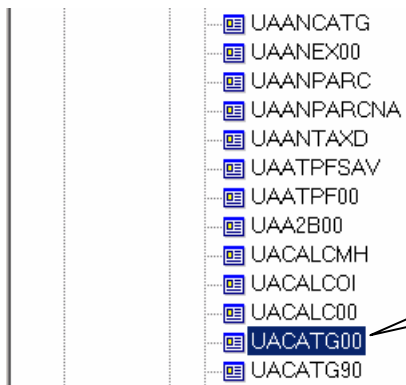

At this point, your connection tree will change. Find & break out the one called "UADFILE".

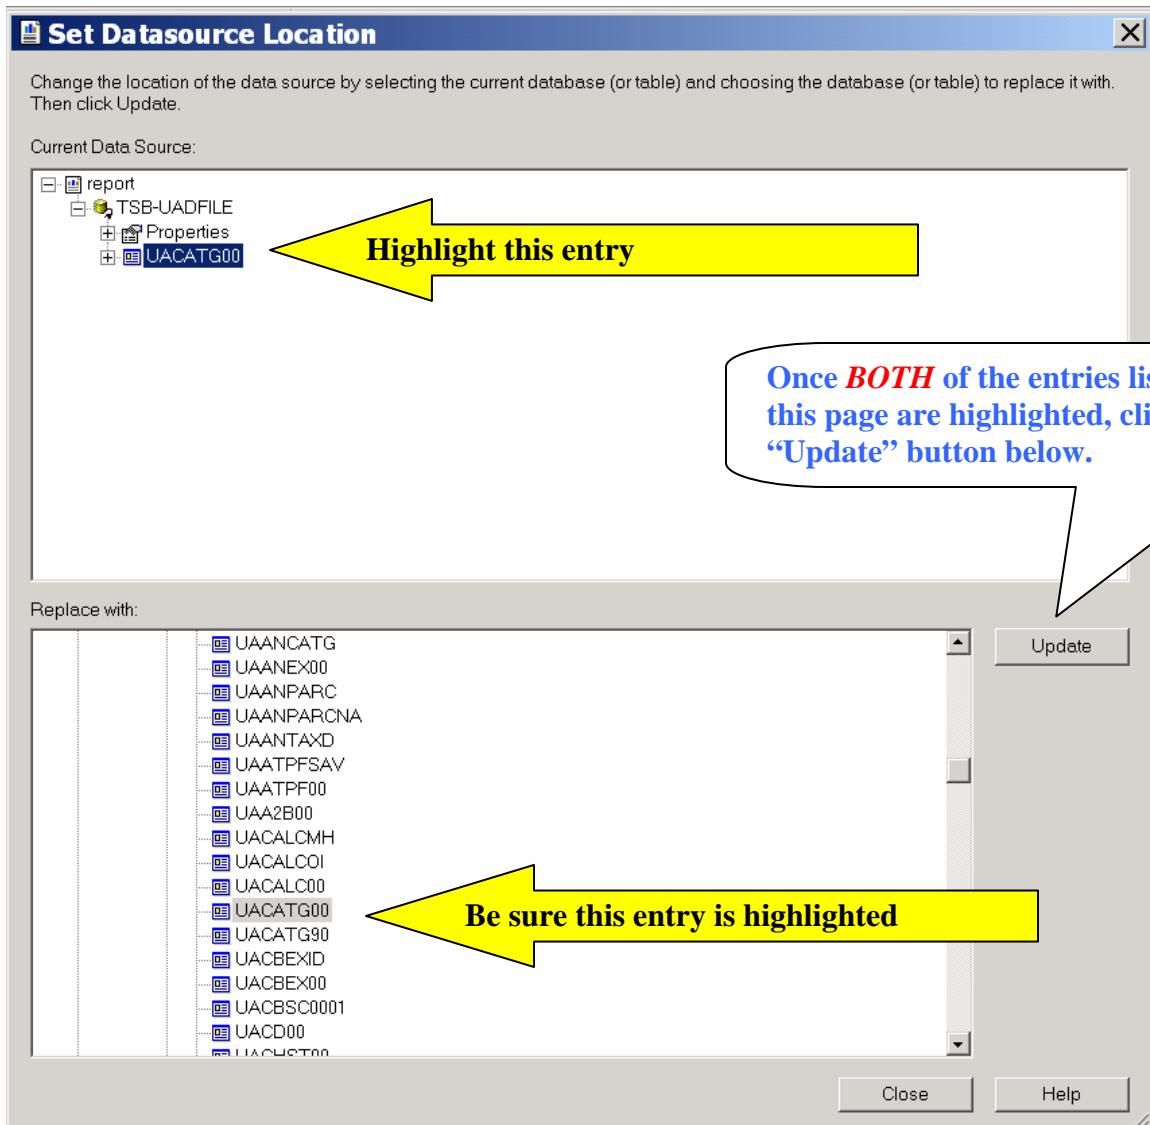

Note: Your layout may look different from the one listed here.

Breakout Tables to get a listing of all the tables (files) within the UADFILE database.

Scroll down until you find the table called “UACATG00”.

After you have performed the "Update" operation listed above, click "Close" to end the "Set Location" routine. At this point, it should connect to your AS400/UADFILE database.
